To support HSC students, we are once again running student revision workshops for the sciences. With a choice of dates, each 2-hour workshop will be delivered by subject experts from CrookED Science, with an emphasis on Module 8 and cross-module links (Module 4 for Science Extension), and involve:

- identifying overarching themes and interrelationships amongst the content
- unpacking of difficult content
- addressing common mistakes and misconceptions
- strategies for extended response questions
- practice questions
- sample responses
- pilot marking
- exam strategies
- opportunities to ask questions

**Every student will receive new resources**
